~~Crop Production \u0026amp; Management 1 | Grade 8 Science | Biology | Vedantu Junior Class 8 Science Chapter 1: Crop Production and Management [Complete Chapter] Crop Management~~

Crop management begins with the sowing of seeds, continues with crop maintenance during growth and development, and ends with crop harvest, storage, and distribution (Tivy, 1990). During seed sowing, a mechanized planter often opens a furrow in the prepared soil seed bed, places the seed in the exposed moist soil, covers the planted seed, and then often packs the soil down to assure firm seed-soil contact.

Crop Management - an overview | ScienceDirect Topics

Crop Management. the group of agricultural practices used to improve the growth, development, and yield of agricultural crops. The combination, timing, and sequence of the practices used depend on the biological characteristics of the crops (whether winter or spring crops), the harvested form (grains, green feed, and so on), the sowing methods ...
