Question 1: What is a Data Structure? Answer: A data structure is a particular way of organizing data in a computer so that it can be used effectively. Question 2: What is the difference between a Stack and a Queue? Answer: Stack: A stack is a linear data structure in which elements can be inserted and deleted only from one side of the list, called the top. A stack follows the LIFO (Last In First Out) principle, i.e., the element inserted at the last is the first element to come out.
