Health Promotion Strategies Through the Life Span, 8th Edition

Health promotion approaches and strategies introduces the various methods used to promote health. The Preliminary PDHPE syllabus says that you need to learn about three approached and strategies for health promotion: lifestyle, preventative, and public health approaches. These health promotion approaches and strategies vary in their effectiveness to address different types of health priorities. Often all three are combined in health promotion in order to achieve improvements in health.

Health promotion approaches and strategies – HSC PDHPE

Health promotion isn't about lecturing or hectoring, or about pushing people into making huge changes in their lives. It's about working with individuals in partnership towards making agreed changes, and taking things one small step at a time.

Health promotion works through concrete and effective community action in setting priorities, making decisions, planning strategies and implementing them to achieve better health. At the heart of this process is the empowerment of communities, their ownership and control of their own endeavours and destinies.
