New Stone Architecture explores the special role of this material in a timely reassessment of the ideas which underpin today's renaissance of stone architecture. The introduction uncovers the expressive possibilities of stone, describes the new technologies which make the new forms possible and offers an interpretation based on the author's technical and theoretical understanding of material themes.

New Stone Architecture (PDF) - Douban

The 4th edition of *Stone in Architecture: Properties, Durability*, is a sophisticated and thorough exploration of stone – its properties, performance and conservation – in monumental contexts. The current editors, Siegfried Siegesmund and Rolf Snethlage, note the pioneering work of Erhard Winkler who wrote the first edition in 1973 when so little information could be found in the literature ...
